

# Docebo System Requirements

## DESKTOP PLATFORM

<b>Supported Desktop Browsers</b>	Microsoft Edge * Mozilla Firefox * Google Chrome * Safari *
<b>Supported Operating Systems</b>	Microsoft Windows 10 or higher OSX (the last two major releases) Most Linux distributions (ChromeOS is not tested.)
<b>Supported Operating Systems for Tablets (using the browser version of the desktop platform)</b>	iOS 18 (or higher) ** Android 12.0 (or higher) **
<b>Browser Settings</b>	JavaScript must be enabled Third-party cookies must be enabled*** localStorage must be enabled TLS Version: 1.2

**Docebo strongly suggests to use at least a 1024x768px resolution on your desktop and tablet browsers.** For the best user experience, Docebo suggests using a 1366x768px resolution or similar.

**\* Browser notes:** Microsoft Edge, Firefox, Chrome and Safari follow a continuous release policy that makes it difficult to fix a minimum version. For this reason, following the market recommendation Docebo will support the last 2 major versions of each of these browsers. Please note that as of January 2018, Docebo does not support Safari on Windows.

Docebo strongly recommends that clients maintain updated operating systems (both desktop and mobile) aligned to the latest release made available by the respective vendor.

**\*\* Note for use on tablets:** When accessing the platform from your tablet, you can access the desktop version of your platform via the mobile browser (to which we refer as “browser version of the desktop platform”).

The browser version only supports Android tablets with an 8” screen or larger and Apple iPads of all sizes.

However, note that you can only access the learner view. No Administrator functionality is supported on the browser version of the desktop platform from your tablet.

**\*\*\* Note for use on Chrome 83 and higher:** Starting from Chrome 83, in order to embed Docebo while using the browser in Incognito mode, third-party [cookies must be manually turned on](#).
